

# Crude Oil Quality Group Meeting

May 25, 2005

## DCTS Meeting Agenda

Houston, TX

- If no one has an objection, Valero's lab in Ardmore Oklahoma will perform the testing for one full year and absorb the cost.
- We still need to get the samples drawn and shipped to the lab in Ardmore.
- Ardmore will report the data to the subcommittee quarterly.
- If we can get samples pulled and submitted to the lab for the month of June, we should be able to review June-August data during the next meeting.
- Any members have data on all or some of the parameters they can share? (stripped of sensitive information on sources and destinations) for OK Domestic Sweet or any other DTC.
- We need someone to handle all data – compile and submit to Harry for posting on the web site.
- Those who indicated they have interest in funding – we can table this for the Feb 2007 meeting – merely verify your company's willingness?
- Valero Crude Trading contacted Plains Pipeline and asked them to attend the meeting.
- Discussion topic – what is the best way to approach Nymex about accepting the additional parameters as standard.

### *COQG DTC member interest:*

Bieber, Scott	Baker Petrolite	Fuchek, Bill	Intertek
