Camin Cargo Control
Refining the Standards for Tomorrow’s Business

1982 – 2013
Established in 1982, Camin Cargo Control operates in more than 70 ports/terminals locations in more than 20 countries within the Americas. We are continuously researching new markets and areas of activity with further expansion opportunities in order to better serve our Customer’s needs.

One of the most respected providers of Inspection Services, Laboratory Services, EPA Compliance Programs, and Petroleum Additive Services in the markets we compete in.
State of the Art Petroleum Lab For Fuel Analysis 24/7

Experienced and Highly Trained Specialists

“Safety” a Primary area of Focus

Strict Ethics Policy
Our Employees
Our Most Important Resource

The key to any successful service business is its personnel. Our services are provided by a highly trained, dedicated staff, many of which have direct maritime experience.

Regardless of previous experience, all Inspection personnel go through a rigorous, standardized training and education program, including certification by IFIA.

Experienced Field staff are mirrored and complemented by our Operations team who, together with our specialized reporting staff, form the bridge between our clients and the events taking place in the field.

Experienced and knowledgeable Laboratory personnel work under a strict QA/QC program to ensure reliable and consistent analytical results.

Taking part in the daily operations, our Quality Assurance staff aims to enhance customer’s satisfaction through the excellence of our personnel and our commitment to continuous improvement of our services.

**Total Number of Employees**

![Total Number of Employees Chart](chart.png)
Inspection Services

- Performed under the guidelines of the International Federation of Inspection Agencies (IFIA), in accordance with current API and ASTM guidelines, as well as standard operating procedures consistent with federal and state governmental regulations.

- Professional, well trained and properly equipped Inspection staff.

- Individually tailored to meet our client’s specific needs.

- Available through a wide network of offices and laboratories.

- Services include vessel load / discharge operations, lighterings, inventories, sampling services and railcar inspections.
Laboratory Services

Active participation in organizations such as API, ASTM, EI, GAFTA, IFIA, etc.

Operate under stringent quality control protocols that exceed industry compliance requirements.

Available “24/7”

Unmatched RFG compliance oversight and reporting services. On par with specialized 3rd-party consultants. Pioneer in automatic data transfer of ‘bubble reports’ to the EPA, over 10 years without a single data discrepancy.
Petroleum Additive Services

- Experienced, highly trained service specialists
- Experts at refinery, terminal and off-shore applications
- Accurate, effective & highly responsive with safety as our primary focus
- Fuel additive application expertise
- Additive truck fleet for “on-time” & quick deliveries
- “Best in class” mobile injection equipment
- Additive service capabilities within the Americas
- Types of fuel treated including gasoline/naphtha, distillate, jet, biodiesel, home heating oil, fuel oil, crude oil, etc.
Camin Cargo Control has been on the forefront of utilizing leading edge information management technologies to optimize service delivery for its customers. Early on, the Company recognized technology’s increasing role within the Inspection Services industry to meet clients performance standards and time reporting requirements.

POLARIS, our propriety software platform, encompasses all activities from order capture, quality data verification and quantity information input from our inspection staff directly in the field.

Through POLARIS EXPLORER, our Clients can access data (both new and historical) from any Internet capable device. Unlimited customer access to Analytical Data, Job Summary Reports and Invoices

Easily adapted to customers needs, allowing direct access to data in the form most readily understood by their own systems.
We work to safeguard your interests
2013 Plans for Improvement

- CCC monitors percent of all Inspectors that are **IFIA certified**. Our goal is to be in 100% for all Inspectors employed with us at least 6 months. Currently we are at 70%.

- Upgrade the POLARIS **HR module** to automatically and electronically tie-in all Inspector safety and client-specific training requirements.

- Our laboratories in Linden, NJ and Pasadena, TX will be certified for the biodiesel laboratory standard, **BQ-9000**, by 3Q2013.

- To continue rolling out our **Inspector Vehicle Program** where we provide Inspectors with new specially-outfitted work vehicles, in lieu of them using personal vehicles. Advantages include GPS geo-fence, safety hotline bumper stickers, weekly vehicle inspections, maintenance program, and more.
We stay on track with our goal of providing the Best Inspection and Laboratory Service
